

Mission & Quality Policy

As market leader within the challenging and rapidly evolving engineering industry for global energy providers, ATC is committed to ensuring the quality, health, safety, security, and environmental protection, and well-being of our people, and those we work with.

Vision

Based on our leading experience and proven compact valve actuation technology, rooted in Dutch engineering excellence and a global mindset, we aim to empower our clients with the high-end solutions they need to succeed and grow in the dynamic landscape of the natural resource production and energy sector.

Mission

ATC is committed to excellence and providing innovative, reliable, and value-added actuation solutions that optimize ownership costs, life cycle costs, efficiency, and safety in the production of mineral and energy resources.

Our added value

Field-proven design	SIL 3 certified
Market leader	High-quality built. Long design life
API 6A licensed/monogrammed company and product	Lower internal friction. Higher efficiency
High reliability & availability of products for safety applications	Fast acting / closing
Less engineering hours are spent when designing the pipe layout by our customers	Optimized torque curve
Better handling for installation/shipment, due to size and centered COG	The actuator diameter remains within the face-to-face/flanges of the valve

Quality

We apply a Quality assurance program that meets the applicable industry standards and is continuously monitored and improved.

Customer success is always a key concern for us, and our quality program helps us deliver quality work on time and on budget.

Our focus on quality fosters a working culture that values everyone's responsibility, collaboration, prevention, standardization, continuous improvement, learning, and innovation. It places an emphasis on the fact that everyone at ATC has a role to play in delivering excellence.
